(54) VOICE RECORDING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a voice recording device easy to set an ID code of user by recording either of an arbitrary ID code set by an ID code setting means and an ID code selected by an ID code selection means in a recording medium with voice data when voice data are recorded in a recording medium.

SOLUTION: A main control section 6 is constituted of a microprocessor CPU, and controls operation of each section of a voice recording and reproducing device. The main control section 6 controls so that either of an arbitrary ID code set by an ID code set operation section 13 and an ID code selected by an ID code selection means is recorded in a recording medium 7 with voice data when voice data is recorded in a recording medium 7. Then, when the prescribed ID code is recorded in the recording medium 7, and ID code selection means are operated preferentially to the ID code set operation section 13, and in the case other than this, only the ID code setting means is operated.
